SUMMARY

Seasoned Engineering Leader operating at the intersection of data and context. Passionate about AI-powered transformation, I design and scale secure, cost-optimized, and available systems that accelerate business outcomes. Skilled in taking products from 0→1 to enterprise scale. With strong FinOps expertise, I help organizations cut cloud costs and optimize outcomes. Through a DevSecOps mindset, I enable teams to iterate faster, more securely, and with greater resilience. Customer-obsessed and outcome-driven, I have a proven record of delivering scalable, resilient, and business-aligned cloud solutions that create long-term value.

EXPERIENCE

Founder & President

Nota

2026 to present Québec, Canada

Nota is building the modern notary experience for Quebec, fixing a slow, paper-heavy industry with software designed around how notaries and their clients actually work.

- Founded Nota to modernize the Quebec notary industry, an underserved, paper-heavy space overdue for software built around how notaries actually work.
- Leading product and technical direction from 0→1, applying the same ship-measure-listen-iterate loop used with consulting clients.

Senior Cloud & Security Architect

Bespoke Labs *via a.team (contract)*

2025 to 2026 Mountain View, California

Series A-funded RL lab that powers the greatest models.

- Built an eval-sandbox platform running AI-agent workloads in isolated Firecracker microVMs, with snapshot and restore that survives Spot preemption.
- Authored RL tasks, grading rubrics, and evals on Horizon, the core platform, modeling the tool environments and reward logic agents are scored against.
- Made key contributions to Horizon, the core RL platform, across rubrics, tasks, and evals.
- Cut cloud spend 30% with Looker cost dashboards, tagging, and rightsizing, and led SOC 2 and security compliance for the platform.

Head of Engineering & Founding Engineer

CREE8

Dec 2023 to 2025 West Hollywood, California

CREE8 streamlines cloud adoption, easing creator workflows through centralization, efficiency, and automation. It empowers creative teams to fully leverage cloud-native capabilities by simplifying complex processes.

- Built and led a team of 10 senior SRE, DevOps, and Full-Stack engineers to deploy enterprise-grade cloud solutions.
- Achieved SOC 2 Type II and TPN Gold certifications within 6 months by implementing AI-driven compliance automation workflows.
- Cut a $500K monthly multi-cloud bill across AWS, GCP, and Azure by 60% through Vantage-driven FinOps practices and architecture improvements, reporting spend to the CFO weekly.

TECHNICAL SKILLS

AWS · Azure · GCP · Storage (Block / File / Object) · AI/ML · LLMs · RL · RAG · AI Agents · Evals · MCP · SageMaker · MLflow · Anaconda · SOC 2 · Zero Trust · IAM · RBAC · Compliance Automation · FinOps · Vantage · Looker · Cost Optimization · DevSecOps · Disaster Recovery · Kubernetes · Docker · Terraform · CI/CD · TDD · BDD · Node.js · TypeScript · Python · Go · WebRTC · AWS Media Services · SQL · NoSQL · KV Store · Big Data · Telemetry

+ many more

LANGUAGES

French Native

English Fluent

CERTIFICATIONS

AWS Certified Solutions Architect, Associate
Amazon Web Services (AWS)

AWS Certified Developer, Associate
Amazon Web Services (AWS)

EDUCATION

DEC, Computer Science
Cégep Garneau, Québec, Canada
2008 to 2011

PERSONAL PROJECTS

Diaspor
diaspor.io

Rust virtual distributed file system with built-in on-device AI that transcribes and auto-tags media locally.

- Pioneered camera-to-cloud workflows, improving content ingestion and collaboration among 50+ distributed creative teams.
- Built and operated multi-cloud MLOps pipelines and environments.
- Accelerated iteration speed by 40%, strengthened system security, and boosted resilience by adopting AI and DevSecOps practices.

Senior Cloud DevOps Engineer
Videotron

Aug 2023 to Feb 2024 Québec, Canada

Led DevOps for websites and streaming. Deployed tools, analyzed metrics, implemented scalable infrastructure, and enhanced security, ensuring resilience and reliability.

Senior Cloud Engineer | Contractor
Banque Fairstone

Sep 2022 to Aug 2023 Montréal, Canada

Led multi-region, multi-account disaster recovery on AWS and integrated monitoring tools for resilience.

Senior Cloud Engineer | Contractor
SSENSE

May 2022 to Sep 2022 Montréal, Canada

Implemented a loyalty system via Talon One integration, synchronizing historical and real-time data for reliable, efficient data exchange with internal systems.

Senior Cloud Engineer
Dormakaba Americas

Oct 2021 to May 2022 Montréal, Canada

Led design of a public API enabling third-party integration with Dormakaba. Built an abstraction layer simplifying lock configuration, enhancing client usability and developer experience in smart access deployment.

Cloud Software Developer
Vanderlande

Sep 2020 to Oct 2021 Québec, Canada

Developed the PAX Divesting Assistant, a self-service app enhancing airport checkpoint efficiency by allowing passengers to handle divestment independently. This reduces agent reliance and boosts automation, improving security and operations.

Software Developer
Vanderlande

Mar 2018 to Oct 2021 Québec, Canada

Developed a decentralized software optimizing luggage throughput at airport checkpoints. Deployed globally, enhancing luggage processing efficiency and improving passenger experience and operational performance.

Software Developer
PetalMD

Apr 2017 to Mar 2018 Québec, Canada

Developed a secure cloud platform enabling healthcare to orchestrate real-time patient care, boosting efficiency, streamlining processes, and improving outcomes.

Software Developer and DevOps
CGI, National Defense

Dec 2014 to Apr 2017 Québec, Canada

Worked on a suite of services that help the military plan and make decisions.

Co-Founder and CTO
Logicale

Sep 2011 to Jan 2014 Québec, Canada

Software company designing and developing custom web applications.

SST Diamantex

sstdiamantex.ca

Workplace-safety app that logs hazards and preventive actions in 30 seconds with GPS, photos, and AI voice transcription.
